ePrincipal® Mobile

Handheld Access all Student Info

Mobile access to student information, school achievement and photos

➤ Transfer student info such as grades, attendance, schedules, demographics and full colour pictures PLUS teacher schedules and more to your handheld

A Must Have

➤ Useful during emergencies such as power failures, police incidents, and investigating suspicious activities PLUS great for medical information on an injured student

The information you need is with you all the time on your handheld device

Reporting Capabilities

- Accommodates various schedule and timetables. Reports on attendance, rosters, student grades, class names, etc.
- View class-by-class achievement, overall standing, compare other classes teaching the same course, and grades/attendance for each student in the class

Spend more time in classroom and hallways with mobile access to information

Works with School Information Systems

➤ Works with many systems including SASI XP, WinSchool and Trillium PLUS many regional and custom systems

You will know where each student should be, at all times

ePrincipal® Mobile PRODUCT FACT SHEET

Overview

ePrincipal Mobile is an application that transfers data from a **student information system** to a handheld. The software includes a desktop application that takes the data and prepares it for the handheld.

Also included is a conduit that transfers the data to the handheld and a handheld application that provides access to the transferred information. ePrincipal Mobile also transfers and links student photos from a yearbook photo CD or other source to a memory card.

Handheld client:

- Select day of the cycle (up to 10 day cycle supported)
- Shows where each student should be at any given time
- Displays teacher schedules, assignments
- Student schedule shows grades, class absents, room number, class name, teacher and daily attendance and tardies
- Demographics displays parent contact information, locker and medical information.
- Full color photo attached to each student
- Search by first name, last name, ID, Locker Search results displayed by schedule or photograph to assist in identification
- School analysis feature shows class achievement results, course comparison and student by student detail (grades and attendance for any class)
- Supports Palm handhelds and Pocket PC version available

Student information interface :

- Desktop based (Windows 98, 2000, XP) Stand alone or network configuration available
- Currently supported systems - SASI XP, WinSchool, Trillium, SAS. Interfaces to other systems may be available upon request.
- Desktop application process and loads data quickly (1-2 minutes average)
